

OUTDOOR LIVING

SUN AND WEATHER PROTECTION SYSTEMS

TRADITION & INNOVATION

«Courage is the first step to any great achievement.» (Johann Wolfgang von Goethe)

1964 FOUNDING

What started 50 years ago with considerable courage in an old cider cellar has today become a leading, global manufacturer of sun and weather protection solutions with production facilities in Switzerland.

FUNCTIONALITY & TECHNOLOGY

Our many years of experience and close cooperation with specialists, architects, planners and dealers enable us to develop innovative products that meet the highest demands. – Yesterday, today and tomorrow.

AESTHETICS & DESIGN

Emotions turn our daily routine into an adventure. The influence of colours and forms play a central role in this. Therefore, STOBAG awnings are customised for you.

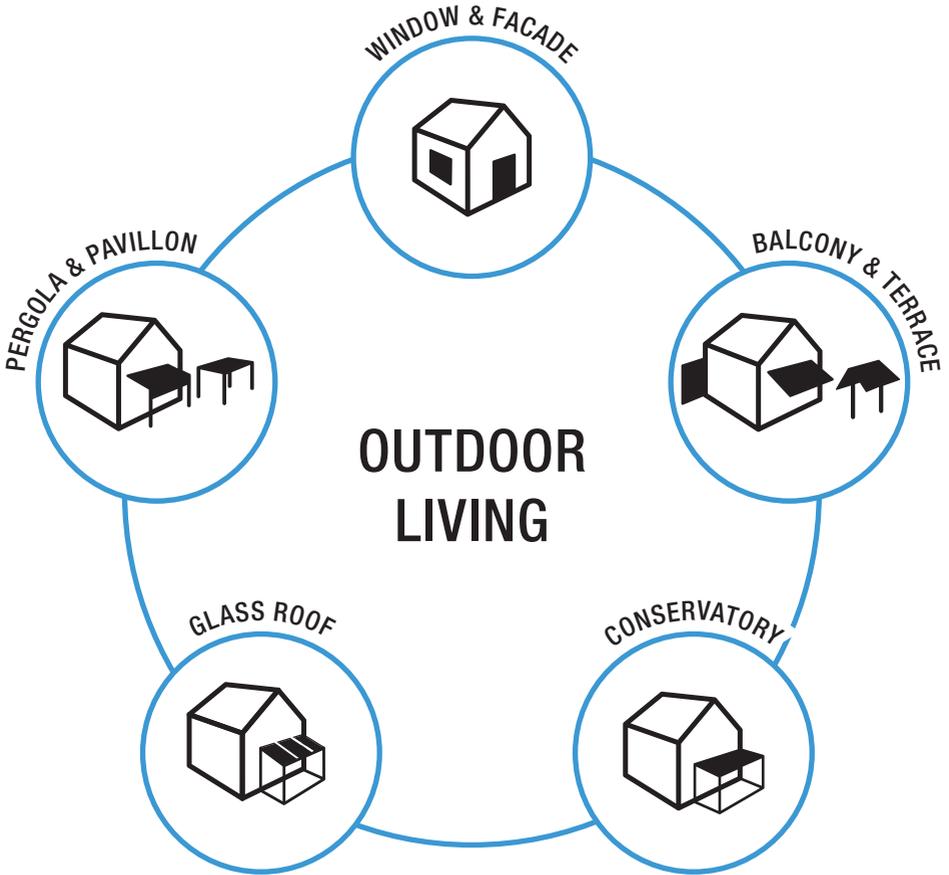

QUALITY & SAFETY

The Gremaud family guarantees you durable, tailored products in uncompromising quality. We achieve this through the consistent use of high-quality materials, modern and environmentally sustainable production processes as well as continuous safety inspections.

STOBAG PRODUCTS & SERVICES

More than 55 individual product solutions tailor-made for you.

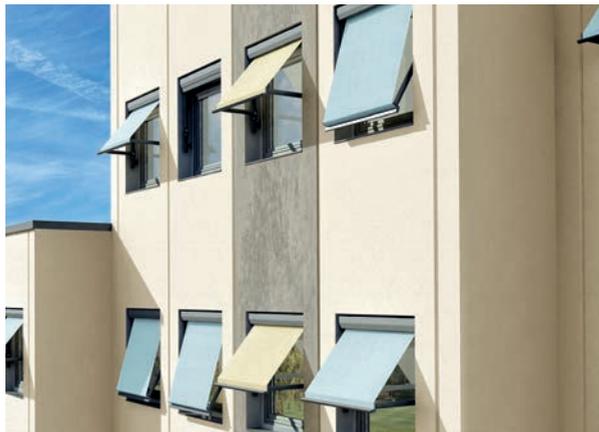

REGISTRATION
REQUIRED

Sale and assembly from qualified STOBAG
specialist dealers.

WINDOW & FACADE

More environmentally friendly than any air-conditioning system: Our facade awnings offer perfect protection against heat and prying eyes.

THE BENEFITS TO YOU

Window and facade awnings also allow you to regulate the amount of light that shines directly into your rooms. The insulating air cushion between the awning fabric and the window provides effective heat protection. Owing to the large selection of cloth and frame colours, products are not only used for thermal insulation, but also as design features in the architecture. The extremely tough security shutters made of impact-resistant aluminium profiles protect your home or company against break-in, vandalism, damage caused by hail or storm.

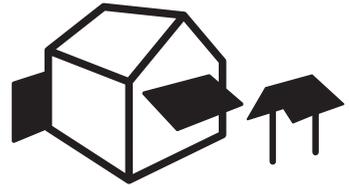

YOUR ADVANTAGES

- Choice of guide types and box shapes
- Vertical awnings without lateral light gap (SIR technology)
- Wind-resistant to 120 km/h
- Daylight control without direct exposure to light
- Stylish alternative to roller blinds and lamellas
- Robust security shutters made from impact-resistant aluminium

BALCONY & TERRACE

Make your terrace or your balcone a superb, private holiday destination!

THE BENEFITS TO YOU

People like to spend most of their free time and time together on their terraces – starting from the first warm rays of sunshine in spring until well into autumn. The right choice of sun and weather protection system ensures a pleasantly cool climate and excellent UV protection. Sometimes you don't just want protection from the sun when you're on the terrace or balcony but also from prying eyes or annoying draughts. STOBAG lateral shading systems were developed for this very purpose.

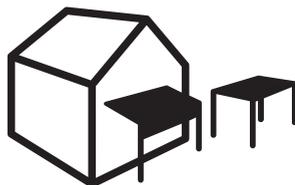

YOUR ADVANTAGES

- Choice of round or square boxes
- Telescopic arm technology for constant high cloth tensioning
- Lateral shading as privacy, glare and wind protection
- Drop down valance as glare protection when the sun is low

PERGOLA & PAVILION

Enjoy the outdoors in sunshine or rain: STOBAG terrace awnings & pavilions are hardwearing and provide extra space in the open air.

THE BENEFITS TO YOU

Terrace awnings offer a lot of benefits for fresh air fans. Frontal support makes the systems very stable. With sufficient incline and fitted with a waterproof cover they not only provide shade but are also ideal for use in the rain. There are a number of product solutions to choose from depending on the particular application, desired dimensions and aesthetic appeal, even free-standing stylish pavilions.

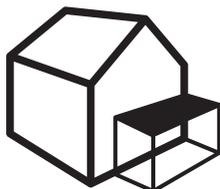

YOUR ADVANTAGES

- Freely-designable living space extensions
- Fabric or aluminium lamellas
- Integrated water run-off system
- Integrated LED illumination
- Optional side / front shading

CONSERVATORY

Tropical temperatures in the conservatory? STOBAG awnings provide the optimal climate and a perfect atmosphere.

THE BENEFITS TO YOU

Glass annexes and conservatories are still very much the trend. However, the great challenge here lies in maintaining the perfect temperature and lighting. While the winter rays of sunshine can be enjoyed behind glass, they quickly become unbearable for inhabitants and plants in spring. To prevent your glass oasis becoming a greenhouse, STOBAG offers tailored conservatory awnings

for the roof as well as the vertical areas. An electric drive, integrated as standard, offers operating comfort and, thanks to the optional automatic sun/wind protection, your conservatory is cooled automatically when outside temperatures start to increase. Specially-suited for installing between buildings and on existing structures, the roof and skylight shading effectively protects against sun and rain.

YOUR ADVANTAGES

- Conservatory awnings with patented telescopic ejection mechanism
- Unique conservatory shapes do not present a problem thanks to extending guide rails
- Horizontal and vertical shadowing

GLASS ROOF

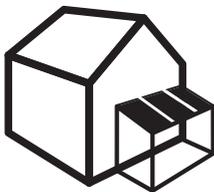

Making light an experience and still being protected in any weather. Glazing makes it possible. No matter the season.

THE BENEFITS TO YOU

Whoever wants to use their terrace in any weather and does not want to pack away their terrace furniture and barbecue in the winter has made the right choice with a glass roof system. The sturdy aluminium structure with integrated glazed roof and optional shading unit combine to give you effective weather protection. Your terrace furniture will always be protected from rain and snow.

Additional extras such as a vertical front shade, side glazing, a privacy screen or atmospheric lighting can be built in as required.

YOUR ADVANTAGES

- All-weather roof
- Furniture is also protected against rain
- LED lighting
- Lateral shading as privacy, glare and wind protection

AWNING ACCESSORIES & OPTIONS

More individuality and convenience with additional options.

FRAME COLOURS

STOBAG profiles and frame components are powder-coated to ensure you can enjoy your sun and weather protection systems in the years ahead as much as on the day they arrived. This environmentally-friendly process offers effective protection for the structure against environmental and weather factors. The maximum possible degree of colour uniformity in an endless array is guaranteed by the highest quality standards.

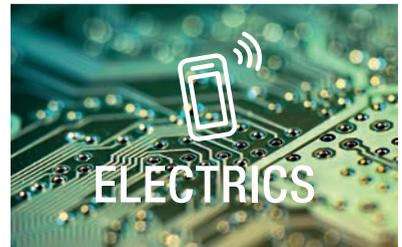

COVER DESIGNS

By choosing a fabric from the STOBAG Collection from European quality weaving mills, you have opted for a top quality high-tech textile product. Let yourself be inspired and enticed by our extensive colour range and the special characteristics of our UV tested acrylic fabrics.

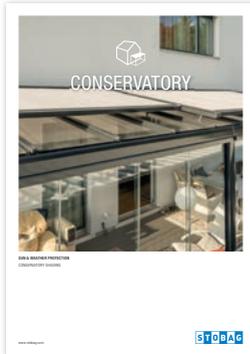

AUTOMATIONS AND CONTROLS

We offer you exactly the comfort that you want from your individual awning system, from simple wind sensors to complex centralised air conditioning. Whether you extend an awning via remote control, turn on atmospheric lighting or want to control the façade and conservatory shading by smartphone: Our reliable automatic systems master any situation.

INDIVIDUAL SUN AND WEATHER PROTECTION FOR YOUR PERSONAL OASIS OF WELL-BEING.
