

ARNEX PS8000

Motorized glass-roof shading with awning fabric made from polyacrylic, which is color-fast, has very high UV protection, offers good tear resistance, and is also resistant to water and dirt depending on the specific fabric type used. Built using extruded aluminum profiles, with surfaces powder-coated to facade quality. Assembled with fittings on the guide rails. Box section sealed by cast aluminum alloy side covers in two sizes (148.5 x 126 mm and 162.5 x 140 mm) with side awning rail mounting and pin connector for the guide rail. Guide rails or front rail with integrated pneumatic-spring pulley system. Fitted as standard with one or two guide tube(s) for awning-fabric support. Depending on the model and size, designed to support wind resistance class 3. Can be operated by remote control, including weather protection mechanism.

ARNEX PS8000 optional features

- Optional zip system as an alternative awning-fabric guide structure
- Various fittings suitable for any installation situation
